MEDICAL MANUFACTURING CLEANROOM CLEANING

ENSURING COMPLIANCE WITH INDUSTRY REGULATIONS

Problem: The cleanroom within the facility required urgent cleaning, including wall washing and floor stripping and waxing, in order to maintain production and comply with strict industry regulations.

Solution: Mid City Cleaning's special services department was contacted to provide the necessary cleaning services. The team quickly assessed the situation and developed a plan to efficiently clean the cleanroom walls and floors. The cleaning process began with the team washing the walls with a specialized solution designed to remove all dust and contaminants. Next, the team used a floor stripper to remove the existing wax coating on the floors. Once the old wax was removed, the team applied fresh coats of wax to protect the floors and make them shine. The team worked efficiently and effectively, ensuring that the cleanroom was ready for use within a short turnaround time. In addition, the team followed all industry regulations and guidelines to ensure that the cleanroom met the highest standards of cleanliness.

Results: Our special services department successfully cleaned the medical manufacturing company's cleanroom, providing a safe and sanitary environment for production to continue. The client was pleased with the quality of the work, the speed of the turnaround, and the professionalism of the Mid City Cleaning team.

Conclusion: Our special services department provides reliable and effective cleaning solutions for even the most challenging environments. By utilizing specialized techniques and equipment, the team is able to quickly and efficiently clean and maintain cleanrooms to ensure compliance with industry regulations and standards.
